COMMENTS ON FINANCIAL PERFORMANCE

The Group made a profit before tax of Rs 6,050,519 during the year ended 31 December 2018 (2017: profit of Rs 4,999,809).

The Company made a profit before tax of Rs 3,588,296 during the year ended 31 December 2018 (2017: profit of Rs 4,646,615).

The directors do not recommend the payment of a dividend.

FINANCIAL STATEMENTS AND INDEPENDENT AUDITOR'S REPORT

The financial statements of the Group and Company for the year ended 31 December 2018 are set out on pages 19 to 69. The independent auditor's report on these financial statements is on pages 15 to 18.

CORPORATE GOVERNANCE DISCLOSURES

The disclosures contained in this report are intended to provide the reader with a description of the Company corporate governance policies and practices. The Company is a public limited liability company incorporated and domiciled in Mauritius. The registered office is United Docks Business Park, Kwan Tee Street, Caudan, Port Louis.

PRINCIPLE 1 - GOVERNANCE STRUCTURE

The Company is engaged in General insurance business and provides Credit insurance policy under Guarantee insurance business class in accordance with the First Schedule Part II of Insurance Act 2005. The company is licensed and regulated by the Financial Services Commission and as such is a public interest entity as defined by the Financial Reporting Act (as amended).

The Board of directors firmly believe in and support high standards of corporate governance, which are critical to the Company's business integrity and as such the Board of Directors ensure the company's full compliance with the principles of the Code for Corporate Governance.

In accordance with its approved Board Charter, Board of Directors assume the entire responsibility for leading and controlling the company ensuring the company meets all its legal and regulatory requirements.

Company law requires the directors to prepare financial statements for each financial year which present fairly the financial position, financial performance and cash flows of the Company. In preparing those financial statements, the directors are required to:

- a) select suitable accounting policies and then apply them consistently;
- b) make judgements and estimates that are reasonable and prudent;
- c) state whether International Financial Reporting Standards, have been followed, subject to any material departures disclosed and explained in the financial statements; and
- d) prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

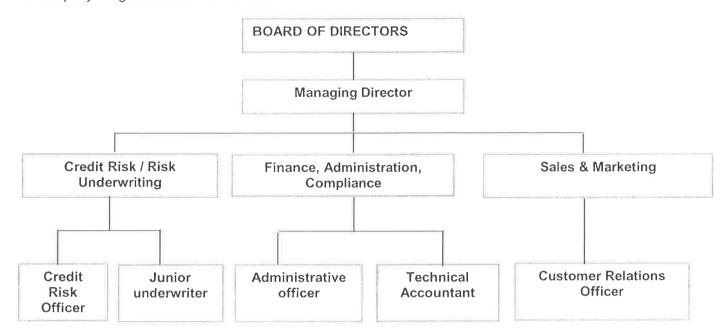

The directors confirm that they have complied with the above requirements in preparing the financial statements.

The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements comply with the Mauritian Companies Act 2001 and the Mauritian Insurance Act 2005 (as amended in 2007). They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

CORPORATE GOVERNANCE REPORT (CONTINUED)

In addition, the Board of directors has approved the company's code of ethics, job descriptions of key senior governance personel and a statement of accountabilities as laid in the Board's Charter.

The company's organisational chart as follows:

PRINCIPLE 2 - THE STRUCTURE OF THE BOARD AND ITS COMMITTEES

The Board of directors is fully aware of its role and responsibility for providing and maintaining good corporate governance. It has taken consideration of the Code of Corporate Governance to ensure that the requirements and standards of good corporate governance are adhered to, especially the establishment of good corporate values, the enhancement of all the Company stakeholders' interests, the management of risk, the implementation of proper management information systems and the integrity of internal controls. The Board of Directors of the company is as laid in its charter is unitary and respective committee charters are reviewed annually to ensure that it remains consistent with the Board's objectives and responsibilities.

| | Appointment Date | Status |

Board sub committees

The board of Credit Guarantee Insurance Co Ltd. is responsible to ensure that the Company adheres to the highest standards of corporate governance. The board has on 21 December 2010 and 08 June 2017, approved the composition and the terms of reference of the following committees in order to comply with the minimum criteria imposed by law and to assist it in the execution of its policies and its decision making process:

- Audit and Risk management committee (21 December 2010)
- Corporate Governance, Nomination and Remuneration Committee (21 December 2010)
- Investment Committee (08 June 2017)

Audit and risk management committee

The Audit and Risk Management Committee has been set up to assist the Board in fulfilling part of its duties and responsibilities, providing a link between the Board, internal audit and external auditors. The Committee is constituted of independent directors. Its responsibilities include reviewing the appropriateness of the Company's accounting policies and assessing the effectiveness of the Company's internal control processes, reviewing the Company's interim and annual financial statements before their submission to the board and discussing the results of the external audit process with the external auditors. The risk management committee approves the risk management processes of the Company and monitors internal controls for identifying and managing risks.

The Committee meets as many times as necessary each year. The chairman of the committee informs the board of the Company of any matters which it should be made aware of.

The members of the audit and risk management committee are:

- Maurice Jean Marc Ulcoq (Chairman)
- Alain Rene Geens
- Danny Fon Sing

Corporate Governance, nomination and remuneration committee

The Corporate Governance and Nomination and Remuneration Committee is responsible for:

the establishment and implementation of systems and procedures to ensure independence of the board from management. The committee provides a link between the board and management in governance matters;

CORPORATE GOVERNANCE REPORT (CONTINUED)

- the appraisal of the performance of the board as a whole as well as its committees. The nomination committee is responsible for making recommendations to the board on the appointment of directors and senior executives. It ensures that the most competent individuals capable of making significant contribution to the prudential management of the Company are appointed to the board and key management positions;
- iii. defining, on behalf of the board, the Company's remuneration policy for senior executives and heads of the departments, and determines the specific remuneration, benefits and other terms and conditions of employment of such persons
- iv. ensuring that disclosures are made in the Annual Report in compliance with the disclosure provisions in the Code of Corporate Governance and to the best international practice.

Committee members are:

- · Mr Alain Rene Geens (Chairman)
- Mr. Dominique Galea
- Mrs. Melanie Faugier (appointed 16 November 2018)

Investment committee

Investment activities form an integral part of insurance business, all investment activities are carried out by the internal investment officer under the supervision and guidance of the Board Investment Committee.

The main objectives of Investment Committee are:

- i. To set out the investment strategy and objectives
- ii. To define the responsibilities with regard to the management of the investment portfolio
- iii. To determine appropriate levels of investment risk which the companies are prepared to accept with the broader guidelines being set by the Board of Directors and/or the Risk Committee (Risk Policy)
- iv. To determine capital allocation criteria
- v. To determine appropriate benchmarks for the measurement of performance
- vi. To maximise investments without compromising the security of the funds through excessive exposure to risk.

Committee members are:

- Mr. Dominique Galea (Chairman)
- Mr. Jean Marc Ulcoq
- Mr. Johan Crabeels

The company secretary is ECS SECRETARIES LTD and is domiciled at 3rd Floor, Labama House, Sir William Newton Street, Port Louis. Amongst its responsibilities, the secretary is required to provide sufficient notice and relevant paper for Annual General Meeting of shareholders and any other shareholders meeting.

CORPORATE GOVERNANCE REPORT (CONTINUED)

PRINCIPLE 3 - DIRECTOR'S APPOINTMENT PROCEDURES

In accordance with its approved Board charter, the Board of directors assumes the responsibilities for:

- Succession planning and drew its succession plan;
- Appointment of directors on the Board;
- Induction of new board members; and
- Continued professional development and ongoing education of its members.

Short biographies of each director

Dominique Galea - Chairman

Dominique Galea, born in 1952, holds an "Hautes Etudes Commerciales" (HEC) degree. He started his career in the textile industry in the early 1980's by setting up an agency business, Kasa Textile & Co Ltd. He has since diversified his activities by acquiring a majority interest in Ducray Lenoir Ltd in 1988, and in Rey & Lenferna Ltd in 1998. The latter subsequently took over Forges Tardieu Ltd in early 2005.

Dominique Galea was appointed to the board of MUA Co. Ltd in June 2010 and was elected Chairman. He is a member of its Corporate Governance, Nomination and Remuneration Committee and of its Risk Committee. Dominique Galea is also the chairman of MUA Co. Ltd, United Docks Ltd, Rey & Lenferna Ltd, Forges Tardieu Ltd, Credit Guarantee Insurance Co. Ltd and Prudence Holding Ltd and a director of Associated Brokers Ltd.

Mélanie Faugier - Non Executive Director

Mélanie Faugier, born in 1980, is the Managing Director of Cottons Trading Ltd. From June 2004 to July 2007, she was the Trading Manager of Thon des Mascareignes (IBL Group). She also worked for Schlumberger Oilfield Services in Equatorial Guinea and for Association Solidari'terre in Madagascar. She was appointed to the board of MUA Co. Ltd in July 2010. She is also a director of the National Mutual Fund Ltd, Feber Associates Ltd and Prudence Holding Ltd.

Mélanie Faugier holds a DEUG in economics from University of Paris I – Panthéon Sorbonne and a Msc in Management from EM Lyon School of Management.

Jean Pierre Guy Noel - Non Executive Director

Jean Pierre Guy Noel holds a BSc (Honours) in Economics from the London School of Economics and Political Science and is an Fellow of the Institute of Chartered Accounts in England and Wales. From 1981 to 1991, he worked at De Chazal du Mée & Co. where he became a partner in financial consultancy. He joined the MCB Group Ltd in 1992 as Planning and Development Consultant before being appointed General Manager of the Bank in 1996. In July 2005, he was appointed Group Chief Executive officer.

Max Danny Kim Shian Fon Sing - Independent Non Executive Director

Danny Fon Sing, born in 1968, holds a BSc in Management Sciences from the London School of Economics. He is a member of the Institute of Chartered Accountant in England & Wales. He previously worked with Coopers & Lybrand in London and is currently an executive director of the MaxCity Group of companies.

Alain Rene Geens - Independent Non Executive Director

Alain is a Belgian national born in 1949. He graduated in Economic Sciences at ICHEC /St Louis Brussels. Alain has 36 years experience in International Insurance and Reinsurance and was a senior executive at Trade Credit Insurance Co. a Brussels based B2B specialized credit insurer which he co-founded in 2005 with other private and corporate investors. He sold his shareholding in 2012 to ONDD ,the Belgian state export credit agency, now the sole shareholder of TCRe. Alain retired from TCRe early 2016.

CORPORATE GOVERNANCE REPORT (CONTINUED)

Maurice Jean Marc Ulcoq - Independent Non Executive Director

M. Jean Marc Ulcoq, born in 1952, is a Fellow Member of the Chartered Association of Certified Accountants. He was the Group Finance Director and Board member of a listed company for 16 years. He was also a member of the task team set up by the Committee on Corporate Governance to consider particular issues with regard to audit and accounting. M. Jean Marc Ulcoq joined Poivre Corporate Services Ltd as Managing Director as from 1st July 2010.

Johan Louis Gaston Crabeels - Executive Director

Johan Crabeels, born in 1953 holds an International MBA from Paris Sorbonne and Dauphine Universities. He gained 20 years experience in credit insurance, political risk and surety across the world as Underwriting Manager with Atradius Re, a subsidiary of the world's second largest credit insurer. He has been involved in reinsurance underwriting, consulting and management.

PRINCIPLE 4: DIRECTORS' DUTIES, REMUNERATION AND PERFORMANCE

As laid in its statement of accountabilities, directors are fully aware of their legal duties as laid in the companies Act 2001 and the Insurance Act 2005 (as amended) and regularly monitor and evaluate compliance with the company's approved Code of ethics.

In accordance with provisions Section 32 of the Insurance Act 2005, an officer / director of the company who has an interest in contract or proposed contract shall, immediately after becoming aware of the contract or proposed contract, disclose in writing or cause to be entered in a record kept for that purpose by the insurer the nature and extent of that interest. The interest register is held by the company secretary and is available to shareholders upon written request to the company secretary.

All conflicts-of-interest and related-party transactions have been conducted in accordance with the conflicts-of-interest and related-party transactions policy and code of ethics of the company.

In addition to the company's code of ethics, the following policy documents have been approved by the Board:

- a. an information policy
- b. an information technology policy
- c. an information security policy

The Board of Directors approved the Security Policy document of the company aimed to define the IT assets policy, security requirements for the proper and secure use of the Information.

Technology services in the company. Its goal is to protect the organization and users to the maximum extent possible against security threats that could jeopardize their integrity, privacy, reputation and business outcomes.

The document applies to all the users in the organization, including temporary users, visitors with temporary access to services and partners with limited or unlimited access time to services. Compliance with policies in this document is mandatory.

The Board is working towards the implementation of a framework for the appraisal of the Board and its Directors, which upon finalisation, will be adopted by the Board.

The Chief Executive Officer, Mr. Johan Crabeels is considered to be the only member of the key management personnel of the Company.

Remuneration packages are prudently designed to attract and motivate directors, executive management and senior management of high calibre to maintain the Company's position in the market. They are also designed to reward them for enhancing the Company's performance.

There is no employee share option scheme.

CORPORATE GOVERNANCE REPORT (CONTINUED)

Remuneration of Directors

The directors received Rs 5,623,190 as directors fees and remuneration during the year ended 31 December 2018 (2017; Rs 4,506,252).

| Directors Remuneration | FEES (Rs) |
|---|---------------|
| GALEA Dominique [Non-Exectuive Chairperson] | 3 (4). |
| FAUGIER Melanie [Mrs] [Non-Executive] | 363 |
| FON SING Max Danny Kim Shian [Independent Non-Excutive] | #8 |
| ULCOQ Maurice Jean Marc [Independent Non-Executive] | 21,250 |
| NOEL, Jean Pierre Guy [Non-Executive] | |
| GEENS, Alain Rene [Independent Non- Executive] | 50,000 |
| CRABEELS, Johan Louis Gaston [Executive] | 5,551,941 |

The Nominations and remunerations committee of the Board had reviewed the adequacy of directors' and senior executives' remuneration and the form of that remuneration of directors' and senior executives' remuneration. Please refer to Note 22 for further details.

PRINCIPLE 5 - RISK GOVERNANCE AND INTERNAL CONTROL

The primary objective of the Company's risk and financial management framework is to protect the Company's shareholders from events that hinder the sustainable achievement of financial performance objectives, including failing to exploit opportunities. The Board recognises the critical importance of having efficient and effective risk management systems in place.

The Company has established a risk management function with clear terms of reference from the board of directors, its committees and the associated executive management committees. This is supplemented with a clear organisational structure with documented delegated authorities and responsibilities from the board of directors to executive management committees and senior managers. Lastly, a policy framework which sets out the risk profiles for the Company, risk management, control and business conduct standards for the Company's operations has been put in place. Each policy has a member of senior management charged with overseeing compliance with the policy throughout the Company.

The board of directors approves the Company's risk management policies and meets regularly to approve any commercial, regulatory and organisational requirements of such policies. These policies define the Company's identification of risk and its interpretation, limit its structure to ensure the appropriate quality and diversification of assets, align underwriting and reinsurance strategy to the corporate goals, and specify reporting requirements. For example, following the regulatory changes brought about by the Financial Services Commission, which came into effect in July 2017, the Company has placed a greater emphasis on the assessment and documentation of risks and controls, including the development of an articulation of 'risk appetite statement' which culmuninates to the establishment of risk based solvency ratios taking into consideration both quantitative and qualititative risks.

The Board of directors consider operational risks to be the key risk facing the company. Operational risks are risks of loss and/or opportunity gain foregone resulting from inadequate or failed internal processes, people and systems or from external events. One or more of the following may cause such losses:

(a) Human Resources Risk

Such risk stems from the fact that staff members entrusted with the management and control of various stages of the business process chain lack the requisite knowledge, skills and experience needed to ensure that critical business objectives are achieved and that significant business risks are reduced to an acceptable level. An internal training programme has been initiated to minimise such risk and external training is also provided with the same objective in mind.

CORPORATE GOVERNANCE REPORT (CONTINUED)

(b) Compliance Risk

Compliance risk, also referred to as non-conformance risk, results in lower quality, higher costs, lost revenues and unnecessary delays. Non-conformance also gives rise to product/service failure risk because if not detected and corrected before a product or service is delivered to the customer, a product or performance failure could result. A legal & compliance officer monitors such matters.

(c) Business Interruption Risk

The Company's capability to operate normally is highly dependent on the availability of information technology, of skilled labour and of other resources. If people with the requisite experience and skills or other key resources were unavailable or if critical systems happened to break down, the Company would experience difficulty in transacting business. A business continuity plan is being devised which is based on the duplication of our records and information systems on back-up files kept at a remote location. Insurance transactions are updated daily to these files. Full customer service can be delivered when systems are restored thanks to the back-up files.

(d) Product/Service Failure Risk

During insurance operations, there may be a risk of customers receiving faulty insurance policies or service. These failures would result in customer complaints, litigated claims, cancelled policies, increased claim frequency or severity. Such events can cause significant damage to the Company's reputation, profitability, future business and market share. The Customer Complaints Handling Procedures take care of these risks.

(e) Health and Safety Risk

Worker health and safety risks are significant if unchecked because they can expose the Company to substantial liability in respect of workers' compensation. Non-compliance with Health and Safety Legislation may result in heavy fines. The management ensures that these risks are minimised through control, follow-up and communication procedures. The legal & compliance officer ensures compliance with labour laws.

Operational risks are identified at management meetings where the Executive Director, Compliance Officer as well as the directors attend. The company deals with key risks identified by brainstorming on a local level as well as seeking guidance from directors' experiences. Action plans and corrective measures are taken to manage the key risks.

The core risk management framework, details and information are laid in detail in section 3: insurance, financial risk and others of the notes to the consolidated financial statements - 31 December 2018.

Internal Controls

The board recognises that risk management within the company is key to successfully carry out its objectives and long term goals. Management is accountable to the Board to identify and implement processes and procedures in order to manage the significant risks. Internal controls are designed to mitigate the risks affecting the business objectives. Internal controls procedures and policies have been designed and implemented by management to address any material misstatement or losses that may be detected.

Whistleblowing policy

The Board has approved a whistle blowing policy which is available on the company's website.

CORPORATE GOVERNANCE REPORT (CONTINUED)

PRINCIPLE 6 - REPORTING WITH INTEGRITY

In accordance to their duties under the enactments, the Board is responsible for preparing accounts that fairly presents the affairs of the company and ensure these accounts adhere to the International accounting standards.

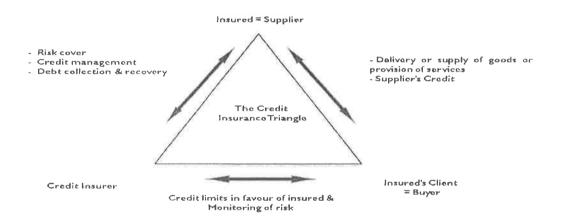

In addition to the above, the Company has developed and implemented social, safety, health and environmental policies and practices that in all material respects comply with existing legislative and regulatory framework.

A copy of the annual report is published in full on the company's website.

Organisation overview

Credit Guarantee Insurance Co. Ltd (CGI) was incorporated in February 2009. The shareholders are Prudence Holding Ltd (60%) and The Mauritius Commercial Bank Ltd (40%). CGI owns 100% of Credit Guarantee Information Services Ltd (CGIS) specifically set up to deal with information and debt collection services.

Product

The PEST summary analysis of the Company as follows:

Key performance outlook

The Company is fairly on target according to its budgets. On a consolidated basis the Company is generating profits effectively wiping off all prior accumulated losses. Management is revamping its strategic plans for the next three years with a consolidated vision of being the best credit insurer in the Indian Ocean.

CORPORATE GOVERNANCE REPORT (CONTINUED)

PRINCIPLE 7: AUDIT

Given the company is a fairly young Company and the financial situation is rapidly improving, the Board of directors has decided not to appoint an Internal Auditor yet. However, Compliance reviews are carried out on the Internal Processes annually and corrective actions are implemented. The board of directors derive assurance that the risk management processes and internal controls in place are effective.

In addition the Audit Committee is responsible to monitor integrity of financial statements of the Company and the Company's annual report and accounts, half-year report and quarterly reports, and to review significant financial reporting judgments contained in them before submission to the Board, focusing particularly on:

- i. Any changes in accounting policies and practices;
- ii. Major judgmental areas;
- iii. Significant adjustments resulting from the audit;
- iv. Compliance with accounting standards;
- v. Compliance other legal requirements in relation to financial reporting imposed by the Regulatory Body
- vi. review with representatives of Management and of the External Auditors, the Company's Audited Annual Financial Statements and to recommend their approval by the Board prior to their submission to the Regulatory Bodies, to the Company's Shareholders, and to the general public.

Auditors are recommended for appointment by the Board of Directors to the shareholders at the Annual General Meeting (AGM) and they hold office from the conclusion of the AGM to the conclusion of the next AGM.

The Audit Committee of the Board is responsible for making recommendation to the Board on the appointment, reappointment and removal of the external auditor, the remuneration and terms of engagement of the external auditor, and any questions of resignation or dismissal of that auditor. In addition, the audit Committee reviews and monitors the external auditor's independence and objectivity and the effectiveness of the audit process in accordance with applicable standard.

The Audit Committee discusses with the external auditor before the audit commences, the nature and scope of the audit and reporting obligations, and ensure co-ordination where more than one audit firm is involved. The audit committee meets with the external auditor with and without the presence of management.

The fees paid to the auditor for audit services and other services were:

| | | 2018 | 2017 |
|----------------|----|---------|---------|
| | | Rs | Rs |
| | | | |
| Audit services | | 634,800 | 517,500 |
| Tax services | _ | 48,300 | 48,300 |
| | Rs | 683,100 | 565,800 |

The auditor, Ernst & Young, holds the office of Auditor of the company for the second year and have indicated its willingness to continue in office and will be automatically reappointed at the Annual Meeting.

At least once every three years, the Audit Committee conducts a thorough assessment of the functioning of the external auditor.

CORPORATE GOVERNANCE REPORT (CONTINUED)

PRINCIPLE 8: RELATIONS WITH SHAREHOLDERS AND OTHER KEY STAKEHOLDERS

HOLDING STRUCTURE

Prudence Holding Limited, a Company incorporated under the Mauritian Companies Act 2001 as a public company, holds 60% of the shareholding of Credit Guarantee Insurance Co Ltd. The MCB Group Ltd holds 40% of the shareholding of Credit Guarantee Insurance Co Ltd.

The MCB Group Ltd, incorporated in 1838, is the leading banking institution in Mauritius, while being an increasingly prominent financial services player in the region. It is listed on the Stock Exchange of Mauritius since 1989 and is the largest quoted company thereon.

Constitution

The constitution of the company does not provide any ownership restriction.

Agreement affecting the governance of the Company by the board

There was no such agreement during the year under review. The company does not have any shareholders' agreement that affects the governance of the company by the Board. All relevant stakeholders have been involved in a dialogue on the organisational position of the Company. At the Company's AGM shareholders in attendance are given the opportunity and are encouraged to ask questions relative the organisation position.

Third party management agreement

There was no management agreement between third parties and the Company during the year under review.

Related Party Transactions

The Company's premium income from risks assumed from related parties amount to Rs 5,079,721 (2017 – Rs 4,922,725). Other related party transactions to which the Company is a party to are disclosed in Note 23 of the financial statements.

Directors' dealing in shares

The directors follow the principles of the model code on securities transactions by directors as detailed in Appendix 6 of the Mauritius Stock Exchange rules. The directors have not held or traded in any shares of the company during the year.

Dividend Policy

There is no formalised dividend policy but the board of directors decide on the quantum of dividends to be declared and paid based on the availability of funds and the Company meeting the solvency test requirements.

Political Donations

The Company did not make any political donations during the financial year ended 31 December 2018 (2017 - Rs Nil).

Charitable Donations

CREDIT GUARANTEE INSURANCE CO. LTD under Section 166(d) of the Mauritian Companies Act 2001

We certify that we have filed with the Registrar of Companies all such returns as are required of the Company under the Mauritian Companies Act 2001.

ECS Secretaries Ltd SECRETARY

26 MAR 2019

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF CREDIT GUARANTEE INSURANCE CO. LTD

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Credit Guarantee Insurance Co. Ltd (the "Company") and its subsidiary (the "Group") set out on pages 19 to 69 which comprise the statements of financial position as at 31 December 2018, and the statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows for the year then ended, and notes to the financial statements, including significant accounting policies.

In our opinion, the financial statements give a true and fair view of, the financial position of the Group and Company as at 31 December 2018, and of their financial performance and their cash flows for the year then ended in accordance with International Financial Reporting Standards and comply with the Companies Act 2001, the Financial Reporting Act 2004 and the Insurance Act 2005.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group and the Company in accordance with the International Ethics Standards Board for Accountant's Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter How the matter was addressed in the audit Technical provisions - Claims outstanding Claims outstanding comprise provisions for the We assessed and tested the design and operating estimated cost of settling all claims incurred up to but effectiveness of selected key controls over the claims not paid, at the reporting date whether reported or estimation process including IBNR. not, together with all related claims handling expenses. In particular, we tested the controls over the integrity of data and the assumptions setting and governance On inception of a policy, the Group determines an processes used by management related to the estimate of the claims loss ratio on each contract. The valuation of general insurance reserves. performance of each contract is regularly reviewed by both the Group and the actuary for past performance In relation to the particular matters set out above, our to ensure reserves are maintained or adjusted as substantive testing procedures included the following: appropriate. Where known large events have occurred but claims have yet to be notified, specific Incurred We reviewed the documentation around outstanding But Not reported (IBNR) estimates may be established claims which are high in value and tested for such events. management best estimates of the settlement outcome for reasonableness

Key Audit Matters (Continued)

| Key Audit Matter | How the matter was addressed in the audit |
|--|---|
| We consider the technical provisions as a key audit matter because it is subject to estimation uncertainties. Refer to Note 2.2 to the consolidated financial statements. | We tested the completeness and accuracy of underlying claims data that are sent to the actuary in estimating the claims loss ratio. This includes the testing of information sent to the actuary for the determination of IBNR. We evaluated whether the actuary has the relevant expertise and experience in this field. In conjunction with our actuarial specialists, we reconciled the data used by our actuarial team to the source systems and to the booked reserves. The work of our actuarial team included reviewing the appropriateness of the reserving methodology, |
| | assessing the assumptions and accuracy used in the calculations of the reserve. |

Other Information

The directors are responsible for the other information. The other information comprises the Corporate Governance Report and the Secretary's Certificate as required by the Companies Act 2001, but does not include the consolidated and separate financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Responsibilities of the Directors for the Financial Statements

The directors are responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act 2001, the Financial Reporting Act 2004 and Insurance Act 2005, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Group and Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intends to liquidate the Group and or the Company or to cease operations, or have no realistic alternative but to do so.

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF CREDIT GUARANTEE INSURANCE CO. LTD (CONTINUED)

Report on the Audit of the Financial Statements (Continued)

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or
 error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is
 sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement
 resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery,
 intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group and the Company to express an opinion on the Group and Company financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF CREDIT GUARANTEE INSURANCE CO. LTD (CONTINUED)

Report on the Audit of the Financial Statements (Continued)

Use of our report

This report is made solely to the Company's members, as a body, in accordance with Section 205 of the Companies Act 2001. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Report on Other Legal and Regulatory Requirements

Companies Act 2001

We have no relationship with or interests in the Company other than in our capacities as auditors, tax advisors and dealings in the ordinary course of business.

We have obtained all the information and explanations we have required.

In our opinion, proper accounting records have been kept by the Company as far as it appears from our examination of those records.

Financial Reporting Act 2004

Our responsibility under the Financial Reporting Act is to report on the compliance with the Code of Corporate Governance disclosed in the annual report and assess the explanation given for non-compliance with any requirements of the Code. From our assessment of the disclosures made on corporate governance in the annual report, the public interest entity has, pursuant to section 75 of the Financial Reporting Act, compiled with the requirements of the Code.

Insurance Act 2005

The financial statements have been prepared in the manner and meet the requirements specified by the Financial Services Commission (FSC).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018

SECTION 1 - CORPORATE INFORMATION

1. Corporate information

The consolidated financial statements of Credit Guarantee Insurance Co. Ltd for the year ended 31 December 2018 were authorised for issue in accordance with a resolution of the directors on 26 March 2019. Credit Guarantee Insurance Co. Ltd (the Company) is a public limited liability company incorporated and domiciled in Mauritius. The registered office is United Docks Business Park, Kwan Tee Street, Caudan, Port Louis.

The Company is engaged in general insurance business and provides credit insurance policy under guarantee insurance business in accordance with the First Schedule Part II of Insurance Act 2005.

The principal activity of the Company's subsidiary is to provide credit worthiness information reports and debt collection service.

SECTION 2: SIGNIFICANT ACCOUNTING POLICIES, JUDGEMENTS AND ESTIMATES

2. Basis of preparation

The principal accounting policies applied in the preparation of the consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

The consolidated financial statements have been prepared in accordance with and comply with International Financial Reporting Standards ("IFRS") and IFRIC interpretations. The consolidated financial statements have been prepared on an historical cost basis, except for financial assets that have been measured at fair value.

As permitted by IFRS 4 Insurance Contracts, the company continues to apply the existing accounting policies that were applied prior to the adoption of IFRS, with certain modifications allowed by the standard subsequent to adoption for its insurance contracts.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. At 31 December 2018, the area involving higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are as follows:

2.1 Basis of consolidation

The consolidated financial statements comprise the financial statements of the Group and its investees that are considered subsidiaries as at 31 December 2018. Subsidiaries are all entities (including structured entities) over which the Company has control. The Company controls an entity when the Company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

Investments in subsidiary is shown at cost less impairment, if any, in the Company's financial statements. Refer to Note 11.

Where an indication of impairment exists, the recoverable amount of the investment is assessed. Where the recoverable amount of an investment is less than its carrying amount, the investment is written down immediately to its recoverable amount and the impairment loss is recognised as an expense in profit or loss. On disposal of an investment in a subsidiary, the difference between the net disposal proceeds and the carrying amount is charged or credited to profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 2: SIGNIFICANT ACCOUNTING POLICIES, JUDGEMENTS AND ESTIMATES

2.2 Valuation of insurance contract liabilities

The uncertainty inherent in the financial statements of the Company arises mainly in respect of insurance liabilities, which include outstanding claims provision (including IBNR). In addition to the inherent uncertainty when estimating liabilities, there is also uncertainty as regards the eventual outcome of claims. As a result, the Company applies estimation techniques to determine the appropriate provisions.

The estimation of ultimate liability arising from the claims made under insurance contracts is one of the Company's most critical accounting estimates. There are sources of uncertainty that need to be considered in the estimate of the liability that the Company will eventually pay for such claims. Estimates have to be made both for the expected ultimate cost of claims reported at the reporting date and for the expected ultimate cost of claims incurred but not reported ("IBNR") at the reporting date. The company uses a range of actuarial methodologies to estimate these provisions. Liabilities for unpaid reported claims are estimated using the input of assessments for individual cases reported to the Group and management estimates based on past claims settlement trends for the claims incurred but not reported. General insurance loss reserves require significant judgment relating to factors and assumptions such as inflation, claims development patterns and regulatory changes.

The Company uses a non-statistical method to incorporate the various assumptions made in order to estimate the ultimate cost of claims. The history of the activity of the Company and the size of its portfolio does not enable yet to use actuarial methods, based on past experience. The directors have adopted a methodology based on a budgeted loss ratio of the underwriting year, as approved by the Actuary. The budgeted loss ratio is applied to the turnover. The IBNR is the difference between the amount calculated and the claims already settled. The IBNR amount for 2018 has been estimated on 50% of the gross written premium, net of 70% reinsurance and net of all paid/payable amounts and recoveries net of reinsurance. Management has also reassessed the IBNR relating to potential claims in 2017 using a claims ratio of 40% of the gross written premium for 2017. An analysis of the actual claims in 2018 has revealed that the actual loss ratio approximates 6.8% for actual claims incurred relating to 2017 underwriting year and management have used the actual loss ratio to determine any additional provision for IBNR.

2.3 Summary of significant accounting policies

a, Product classification

Insurance contracts are those contracts where the company has accepted significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder. As a general guideline, the company determines whether it has significant insurance risk, by comparing benefits payable after an insured event with benefits payable if the insured event did not occur. Insurance contracts can also transfer financial risk.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or expire.

b. Functional and presentation currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The financial statements are presented in Mauritian rupees ("Rs") rounded to the nearest Rupee.

c. Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 2: SIGNIFICANT ACCOUNTING POLICIES, JUDGEMENTS AND ESTIMATES

2.3 Summary of significant accounting policies (continued)

d. Furniture and equipment

All furniture and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent expenditures are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred. Depreciation is calculated on the straight-line basis at annual rates estimated to write off the cost of the assets less their estimated residual values over their expected useful lives.

The annual rates used are

| 10% |
|-----|
| 25% |
| 20% |
| 20% |
| |

The assets' residual values and useful lives are reviewed, are adjusted if appropriate, at the end of each reporting period. Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss.

e. Computer software

Costs associated with acquiring and implementing computer software programs that are clearly associated with an identifiable and unique product which will be controlled by the Company and has a probable benefit are recognised as assets. Directly attributable costs that are capitalised as part of the software product include the software development employee costs and an appropriate portion of relevant overheads.

Computer software costs recognised as assets are amortised using the straight-line method over their useful lives, not exceeding a period of 4 years.

Costs associated with maintaining computer software programmes are recognised as an expense when incurred.

f. Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as financial assets at FVPL, loans and receivables, held to maturity (HTM) investments, available-for-sale (AFS) financial assets, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. Financial assets are recognised initially at fair value plus, in the case of investments not at FVPL, directly attributable transaction costs that are attributable to the acquisition of the financial asset.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 2: SIGNIFICANT ACCOUNTING POLICIES, JUDGEMENTS AND ESTIMATES

2.3 Summary of significant accounting policies (continued)

f. Financial Instruments (Continued)

The classification depends on the purpose for which the investments were acquired or originated. Financial assets are classified as at FVPL where the Company's documented investment strategy is to manage financial investments on a fair value basis, because the related liabilities are also managed on this basis. The AFS and HTM categories are used when the relevant liability (including shareholders' funds) is passively managed and/or carried at amortised cost.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

The Company's financial assets include cash and short-term deposits, trade and other receivables, reinsurance assets, quoted financial instruments.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in three categories:

- AFS financial assets
- · Loans and receivables
- · HTM investments

Available-for-sale financial assets

AFS financial assets include equity securities. Equity investments classified as AFS are those that are neither classified as held for trading nor designated at FVPL.

After initial measurement, AFS financial assets are subsequently measured at fair value, with unrealised gains or losses recognised in OCI in the AFS reserve (equity). Where the Company holds more than one investment in the same security, they are deemed to be disposed of on a first-in first-out basis. Interest earned whilst holding AFS investments is reported as interest income using the EIR. Dividends earned whilst holding AFS investments are recognised in the statement of profit or loss as 'Investment income' when the right of the payment has been established. When the asset is derecognised or determined to be impaired, the cumulative gain or loss is reclassified from AFS reserve to the statement of profit or loss.

The Company measures financial instruments at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 2: SIGNIFICANT ACCOUNTING POLICIES, JUDGEMENTS AND ESTIMATES

2.3 Summary of significant accounting policies (continued)

f. Financial Instruments (continued)

Financial assets (continued)

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. For the purpose of fair value disclosures, the bank has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

The Company evaluates whether the ability and intention to sell its AFS financial assets in the near term is still appropriate. When, in rare circumstances, the Company is unable to trade these financial assets due to inactive markets, the Company may elect to reclassify these financial assets if management has the ability and intention to hold the assets for the foreseeable future or until maturity. Reclassification to loans and receivables is permitted when the financial asset meets the definition of loans and receivables and management has the intention and ability to hold these assets for the foreseeable future or until maturity. The reclassification to HTM is permitted only when the entity has the ability and intention to hold the financial asset until maturity.

For a financial asset reclassified out of the available-for-sale category, the fair value at the date of reclassification becomes its new amortised cost and any previous gain or loss on that asset that has been recognised in equity is amortised to profit or loss over the remaining life of the investment using the EIR. Any difference between the new amortised cost and the maturity amount is also amortised over the remaining life of the asset using the EIR. If the asset is subsequently determined to be impaired, then the amount recorded in equity is reclassified to the statement of profit or loss.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, loans and receivables are measured at amortised cost, using the EIR method, less allowance for impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the EIR. The EIR amortisation is included in 'Investment income' in the statement of profit or loss. Gains and losses are recognised in the statement of profit or loss when the investments are derecognised or impaired, as well as through the amortisation process.

Held to maturity financial assets

Non-derivative financial assets with fixed or determinable payments and fixed maturities are classified as held to maturity when the Company has the positive intention and ability to hold until maturity. After initial measurement, held to maturity financial assets are measured at amortised cost, using the EIR, less impairment. The EIR amortisation is included in 'Investment income' in the statement of profit or loss. Gains and losses are recognised in the statement of profit or loss when the investments are derecognised or impaired, as well as through the amortisation process.

Derecognition of financial assets

A financial asset (or, when applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- The rights to receive cash flows from the asset have expired Or
- The Company has transferred its right to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either: (a) the Company has transferred substantially all the risks and rewards of the asset or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its right to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Company's continuing involvement in the asset. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 2: SIGNIFICANT ACCOUNTING POLICIES, JUDGEMENTS AND ESTIMATES

2.3 Summary of significant accounting policies (continued)

f. Financial Instruments (continued)

Financial assets (continued)

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Impairment of financial assets

The Company assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, there is objective evidence of impairment as a result of one or more events that has occurred since the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that a debtor or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Financial assets carried at amortised cost

For financial assets carried at amortised cost, the Company first assesses whether impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Company determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

The amount of any impairment loss identified is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate.

The carrying amount of the asset is reduced through the use of an allowance account and the loss is recognised in the statement of profit or loss. Interest income (recorded as investment income in the statement of profit or loss) continues to be accrued on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the Company. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a write-off is later recovered, the recovery is credited to finance costs in the statement of profit or loss.

Available-for-sale financial investments

For AFS financial investments, the Company assesses at each reporting date whether there is objective evidence that an investment or a group of investments is impaired.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 2: SIGNIFICANT ACCOUNTING POLICIES, JUDGEMENTS AND ESTIMATES

2.3 Summary of significant accounting policies (continued)

f. Financial Instruments (continued)

Financial assets (continued)

In the case of equity investments classified as AFS, objective evidence would include a 'significant or prolonged' decline in the fair value of the investment below its cost. 'Significant' is evaluated against the original cost of the investment and 'prolonged' against the period in which the fair value has been below its original cost. Where there is evidence of impairment, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognised in the statement of profit or loss – is removed from OCI and recognised in the statement of profit or loss. Impairment losses on equity investments are not reversed through profit or loss; increases in their fair value after impairment are recognised directly in OCI.

The determination of what is 'significant' or 'prolonged' requires judgement. In making this judgement, the Company evaluates, among other factors, the duration or extent to which the fair value of an investment is less than its cost. In the case of debt instruments classified as AFS, impairment is assessed based on the same criteria as financial assets carried at amortised cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortised cost and the current fair value, less any impairment loss on that investment previously recognised in the statement of profit or loss.

Future interest income continues to be accrued based on the reduced carrying amount of the asset and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of investment income. If, in a subsequent year, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in the statement of profit or loss, the impairment loss is reversed through the statement of profit or loss.

Impairment of non-financial assets

Non-financial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). The impairment test also can be performed on a single asset when the fair value less cost to sell or the value in use can be determined reliably. Non-financial assets that suffered impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

Financial liabilities

The Company's holding in financial liabilities represents mainly insurance liabilities, unearned premium, unexpired risks provision, creditors arising from reinsurance arrangements and other liabilities. Such financial liabilities are initially recognised at fair value and subsequently measured at amortised cost.

g. Current and deferred income tax

Current income tax

The tax expense for the year comprises current and deferred income tax. The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted by the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 2: SIGNIFICANT ACCOUNTING POLICIES, JUDGEMENTS AND ESTIMATES

- 2.3 Summary of significant accounting policies (continued)
- g. Current and deferred income tax (Continued)

Current income tax (Continued)

It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. Deferred income tax is provided on temporary differences arising on amortisation of computer software, depreciation of furniture and equipment, IBNR provision and provision for impairment, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current income tax assets against current income tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

The directors have recognised deferred tax assets of Rs 938,651 at 31 December 2018 (2017: Rs 1,854,830) as the Company is generating taxable profits and is expected to continue to generate taxable profits in the foreseeable future based on management's budgets and forecasts.

h. Trade receivables

Trade receivables are amounts due from customers for services rendered in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

i. Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less. Cash and cash equivalents are recognised initially at fair value and subsequently measured at amortised cost.

j. Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 2: SIGNIFICANT ACCOUNTING POLICIES, JUDGEMENTS AND ESTIMATES

2.3 Summary of significant accounting policies (continued)

k. Provisions

Provisions for restructuring costs and legal claims are recognised when: the Company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

I. Dividend payable

Dividends on ordinary shares are charged to equity in the period in which they are declared. The issue of equity instruments are shown in equity, as a deduction from the proceeds net of tax.

m. Share capital

Ordinary shares are classified as share capital in equity. Incremental cost directly attributable to the issue of these shares are recognised in equity, net of tax

n. Trade payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest rate method.

o. Revenue from contracts with customers

The Company's revenue comprises the fair value of proceeds for services rendered, net of value-added tax.

The subsidiary's principal activities are to provide credit worthiness information report and debt collection service. Revenue from contracts with customers is recognised when control of the goods and services are transferred to the customer at an amount that reflects the consideration to which the subsidiary expects to be entitled in exchange for those goods and services. The subsidiary has generally concluded that it is the principal in its revenue arrangements, because it typically controls the goods and services before transferring them to the customer.

Sale of goods

Revenue from sale of credit worthiness reports is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the products. The normal credit term is 30 to 90 days from invoice date.

The subsidiary considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated (e.g., warranties, customer loyalty points). In determining the transaction price for the sale of the products, the subsidiary considers the effects of variable consideration, the existence of significant financing components, noncash consideration, and consideration payable to the customer (if any). The company concluded that none of the above is applicable.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 2: SIGNIFICANT ACCOUNTING POLICIES, JUDGEMENTS AND ESTIMATES

- 2.3 Summary of significant accounting policies (continued)
- o. Revenue from contracts with customers (continued)

Rendering of services

The subsidiary provides debt collection services. Revenue from providing services is recognised in the accounting period in which the services are rendered. Consideration is variable and is highly susceptible to factors outside the entity's influence. Revenue is recognised only when it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. Hence, revenue from rendering of services is recognised at a point in time, when the uncertainty is resolved.

Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Company performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

Trade receivables

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section 2.3.

Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

Investment income

Income from investments is included in profit or loss on the following bases: Interest - As it accrues using the effective interest rate method.

p. Processing fee

Fees are recognised on inception of the insurance contract and are accounted within gross premiums.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 2: SIGNIFICANT ACCOUNTING POLICIES, JUDGEMENTS AND ESTIMATES

2.3 Summary of significant accounting policies (continued)

q. Insurance contracts

Recognition and measurement

Insurance contracts and investment contracts are classified in the categories below, depending on the duration of risk and whether or not the terms and conditions are fixed.

Short-term insurance contracts

For short-term insurance contracts, premiums are recognised as revenue (earned premiums) proportionally over the period of coverage. The portion of premium received on in-force contracts that relates to unexpired risks at the end of the reporting period is reported as the unearned premium liability. Premiums are shown before deduction of commission and are gross of any taxes or duties levied on premiums.

Written and reinsurance premiums are accounted for when the policies incept. Unearned premiums represent the proportion of premiums written in the year that relate to the unexpired terms of policies in force at the end of the reporting period, calculated on the basis of the 365th method on 80% of premiums written in the year less proportional reinsurance. 20% of the premiums written in the year is credited to profit or loss in the year to cover administrative expenses and other acquisition costs. Premiums are shown before deduction of commission and are net of any taxes or duties levied on premiums.

Claims and loss adjustment expenses are charged to profit or loss as incurred based on the estimated liability for compensation owed to contract holders or third parties damaged by the contract holders. They include direct and indirect claims settlement costs and arise from events that have occurred up to the end of the reporting period even if they have not yet been reported to the Company. The Company does not discount its liabilities for unpaid claims. Liabilities for unpaid claims are estimated using the input of assessments for individual cases reported to the Company and statistical analyses for the claims incurred but not reported, and to estimate the expected ultimate cost of more complex claims that may be affected by external factors (such as court decisions).

Reinsurance contracts held

Contracts entered into by the Company with reinsurers under which the Company is compensated for losses on one or more contracts issued by the Company and that meet the classification requirements for insurance contracts are classified as reinsurance contracts held. Contracts that do not meet these classification requirements are classified as financial assets. Insurance contracts entered into by the Company under which the contract holder is another insurer (inwards reinsurance) are included with insurance contracts.

The benefits to which the Company is entitled under its reinsurance contracts held are recognised as reinsurance assets. These assets consist of short-term balances due from reinsurers, as well as longer term receivables that are dependent on the expected claims and benefits arising under the related reinsured insurance contracts. Amounts recoverable from or due to reinsurers are measured consistently with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance liabilities are primarily premiums payable for reinsurance contracts and are recognised as an expense when due.

In certain cases, a reinsurance contract is entered into retrospectively to reinsure a notified claim under the Company's credit guarantee insurance contracts. Where the premium due to the reinsurer differs from the liability established by the Company for the related claim, the difference is amortised over the estimated remaining settlement period.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 2: SIGNIFICANT ACCOUNTING POLICIES, JUDGEMENTS AND ESTIMATES

2.3 Summary of significant accounting policies (continued)

g. Insurance contracts (Continued)

Reinsurance contracts held (Continued)

The Company assesses its reinsurance assets for impairment on a quarterly basis. If there is objective evidence that the reinsurance asset is impaired, the Company reduces the carrying amount of the reinsurance asset to its recoverable amount and recognises that impairment loss in profit or loss. The Company gathers the objective evidence that a reinsurance asset is impaired using the same process adopted for financial assets held at amortised cost. The impairment loss is calculated following the same method used for these financial assets.

r. Receivables and payables related to insurance contracts

Receivables and payables are recognised when due. These include amounts due to and from brokers and insurance contract holders. If there is objective evidence that the insurance receivable is impaired, the Company reduces the carrying amount of the insurance receivable accordingly and recognises that impairment loss in profit or loss. The Company gathers the objective evidence that an insurance receivable is impaired using the same process adopted for loans and receivables. The impairment loss is calculated under the same method used for these financial assets.

s. Insurance liabilities

The net liability recognised for insurance contracts is tested for adequacy by discounting current estimates of all future contractual cash flows, and comparing this amount to the carrying value of the liability.

t. Case reserves - IBNR ('Incurred but not reported') provisions

The Company uses a non-statistical method to incorporate the various assumptions made in order to estimate the ultimate cost of claims. The history of the activity of the Company and the size of its portfolio does not enable yet to use actuarial methods, based on past experience. The directors have adopted a methodology based on a budgeted loss ratio of the underwriting year, as approved by the Actuary. The budgeted loss ratio is applied to the turnover. The IBNR is the difference between the amount calculated and the claims already settled. The IBNR amount for 2018 has been estimated on 50% of the gross written premium, net of 70% reinsurance and net of all paid/payable amounts and recoveries net of reinsurance. Management has also reassessed the IBNR relating to potential claims in 2017 using a claims ratio of 40% of the gross written premium for 2017. An analysis of the actual claims in 2018 has revealed that the actual loss ratio approximates 6.8% for actual claims incurred relating to 2017 underwriting year and management have used the actual loss ratio to determine any additional provision for IBNR.

u. Employee benefit - Pension obligation & Termination benefits

The Company provides retirement benefits for its employees through a defined contribution plan which is funded by contributions from the Company. Under the defined contribution plan, the Company has no legal or constructive obligation to contribute further to what has been contributed into the fund as defined in the rules of the scheme. Pension contributions are charged to the statement of profit and loss and other comprehensive income in the year to which they relate. The Company has an obligation under the current labour laws to pay a severance allowance on retirement of its employees and is allowed to deduct from this severance allowance up to five times the amount of any annual pension granted at retirement age from the said fund.

The present value of the severance allowance payable under the Employment Rights Act 2008 is calculated annually by independent actuaries using the projected unit credit method. The present value of the severance allowance is determined by the estimated future cash outflows using a discount rate by reference to current interest rates and the yield on bonds and treasury bills and recent corporate debenture issues.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 2: SIGNIFICANT ACCOUNTING POLICIES, JUDGEMENTS AND ESTIMATES

2.3 Summary of significant accounting policies (continued)

u. Retirement benefits (Continued)

Where the present value of the severance allowance payable on retirement is greater than five years of pension payable under the pension plan, the additional severance allowance payable is recognised as a liability and disclosed as unfunded obligations under retirement benefits obligations. The obligations arising under this item are determined by Actuarial valuation carried out every year.

Termination benefits become payable whenever an employee's employment is terminated before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Company recognises termination benefits when it is demonstrably committed to either terminate the employment of current employees according to a detailed formal plan without possibility of withdrawal or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Refer to Note 20 for more details.

v. Leases

The determination of whether an arrangement is a lease, or contains a lease, is based on the substance of the arrangement at the inception date and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset (or assets) and the arrangement conveys a right to use the asset (or assets), even if that asset is (or those assets are) not explicitly specified in an arrangement. A lease is classified at the inception date as a finance lease or an operating lease.

Operating lease payments are recognised as an expense in the statement of profit or loss on a straight line basis over the lease term.

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.1 Governance framework

The primary objective of the Company's risk and financial management framework is to protect the Company's shareholders from events that hinder the sustainable achievement of financial performance objectives, including failing to exploit opportunities. Key management recognises the critical importance of having efficient and effective risk management systems in place.

The Company has established a risk management function with clear terms of reference from the board of directors, its committees and the associated executive management committees. This is supplemented with a clear organisational structure with documented delegated authorities and responsibilities from the board of directors to executive management committees and senior managers. Lastly, a policy framework which sets out the risk profiles for the Company, risk management, control and business conduct standards for the Company's operations has been put in place. Each policy has a member of senior management charged with overseeing compliance with the policy throughout the Company.

The board of directors approves the Company's risk management policies and meets regularly to approve any commercial, regulatory and organisational requirements of such policies. These policies define the Company's identification of risk and its interpretation, limit its structure to ensure the appropriate quality and diversification of assets, align underwriting and reinsurance strategy to the corporate goals, and specify reporting requirements. For example, following the regulatory changes brought about by the Financial Services Commission, which came into effect in July 2017, the Company has placed a greater emphasis on the assessment and documentation of risks and controls, including the development of an articulation of 'risk appetite'.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.2 Asset liability management (ALM) framework

Financial risks arise from open positions in interest rate and currency, all of which are exposed to general and specific market movements. The main risk that the Company faces, due to the nature of its investments and liabilities, is interest rate risk. The Company manages these positions within an ALM framework that has been developed to achieve long-term investment returns in excess of its obligations under insurance contracts. The principal technique of the Company's ALM is to match assets to the liabilities arising from insurance contracts by reference to the benefits payable to contract holders. For each distinct category of liabilities, a separate portfolio of assets is maintained.

The Company's ALM is integrated with the management of the financial risks associated with the Company's other financial assets and liabilities not directly associated with insurance liabilities and as an integral part of the insurance risk management policy, to ensure in each period sufficient cash flow is available to meet liabilities arising from insurance contracts

3.3 Insurance risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Company faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims and benefits are greater than estimated. Insurance events are random, and the actual number and amount of claims and benefits will vary from year to year from the level established using statistical techniques.

The Company issues contracts that transfer insurance risk or financial risk or both.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected by a change in any subset of the portfolio. Factors that aggravate insurance risk include lack of risk diversification in terms of amount of risk, geographical location and type of industry covered.

The following tables disclose the concentration of insurance liabilities by the class of business in which the contract holder operates and by the maximum insured loss limit included in the terms of the policy. The amounts are the maximum insured loss limit amounts of the insurance liabilities (gross and net of reinsurance) arising from insurance contracts:

Year end - 31 December 2018 Class of business: General

Credit Insurance business - Gross

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.3 Insurance risk (continued)

| Year end - 31 December 2017 | THE GROUP AND THE COMPANY | | | | | |
|-----------------------------------|---------------------------|----------------------|------------------|-----------------|--|--|
| Class of business: General | Rs 000 0-15 m | Rs 000 15m - 100m | Rs 000 > 100m | Rs 000 Total | | |
| Credit Insurance business - Gross | 419,917 | 851,814 | 2,150,385 | 3,422,116 | | |
| Credit Insurance business - Net | 125,975 | 255,544 | 645,116 | 1,026,635 | | |

Frequency and severity of claims

The frequency and severity of claims can be affected by several factors.

The most significant are:

- · Court awards for damages suffered as a result of default from debtors;
- · Increase in the number of cases coming to court; and
- Economic downturn and the resulting deterioration in customers' credit risk.

The Company manages these risks through its underwriting strategy, adequate reinsurance arrangements and proactive claims handling. The underwriting strategy attempts to ensure that the underwritten risks are well diversified in terms of type and amount of risk and industry.

Underwriting limits are in place to enforce appropriate risk selection criteria. For example, the Company has the right not to renew individual policies, it can impose deductibles and it has the right to reject the payment of a fraudulent claim. Insurance contracts also entitle the Company to sue third parties for payment of some or all costs (for example, subrogation). Approval authority for any contract in which the Company is committed to cover risks in excess of Rs 1 million and up to Rs 15 million requires the approval of the Credit Risk Manager, from Rs 15 Million to Rs 30 million and up to Rs 100 million requires the approval of the Credit Risk Committed to cover risks in excess of Rs 30 million and up to Rs 100 million requires the approval of the Credit Risk Committee. For contracts in which the Company is committed to cover risks in excess of Rs 100 million requires the approval of the reinsurer.

The reinsurance arrangements include treaty, excess of loss and facultative coverage. The effect of such reinsurance arrangements is that the Company should not suffer total net insurance losses of more than Rs 5,625,000 (worst case scenario) in any one event.

Sources of uncertainty in the estimation of future claims payment

Claims on insurance contracts are payable on a claims-occurrence basis. The Company is liable for all insured events that occurred during the term of the contract, even if the loss is discovered after the end of the contract term. As a result, liability claims are settled over a long period of time, and a larger element of the claims provision relates to incurred but not reported claims (IBNR). There are several variables that affect the amount and timing of cash flows from these contracts. These mainly relate to the inherent risks of the business activities carried out by individual contract holders and the risk management procedures they adopted. The compensation paid on these contracts is the monetary awards mainly granted for default on debtors factored by the customer.

The estimated cost of claims includes direct expenses to be incurred in settling claims, net of the expected subrogation value and other recoveries. The Company takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is likely that the final outcome will prove to be different from the original liability established. The liability for these contracts comprises a provision for IBNR, a provision for reported claims not yet paid and a provision for unexpired risks

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.3 Insurance risk (continued)

Sources of uncertainty in the estimation of future claims payment (Continued)

at the end of the reporting period. The amount of claims is particularly sensitive to the level of court awards and to the development of legal precedent on matters of contract and tort.

In calculating the estimated cost of unpaid claims (both reported and not), the estimation techniques are a combination of loss-ratio-based estimates (where the loss ratio is defined as the ratio between the ultimate cost of insurance claims and insurance premiums earned in a particular financial year in relation to such claims) and an estimate based upon actual claims experience using predetermined formulae where greater weight is given to actual claims experience as time passes.

Frequency and severity of claims

The estimation of IBNR is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the Company, where information about the claim event is available. IBNR claims may not be apparent to the insured until many years after the event that gave rise to the claims. In estimating the liability for the cost of reported claims not yet paid, the Company considers any information available from loss adjusters and information on the cost of settling claims with similar characteristics in previous periods. Large claims are assessed on a case-by-case basis or projected separately in order to allow for the possible distortive effect of their development and incidence on the rest of the portfolio.

Process used to decide on assumptions

The risks associated with insurance contracts are complex and subject to a number of variables that complicate quantitative sensitivity analysis.

The Company uses assumptions based on a mixture of internal and market data to measure its claims liabilities. Internal data is derived mostly from the Company's quarterly claims reports and screening of the actual insurance contracts carried out at year-end to derive data for the contracts held. The Company has reviewed the individual contracts and in particular the industries in which the insured companies operate and the actual exposure years of claims. This information is used to develop scenarios related to the latency of claims that are used for the projections of the ultimate number of claims.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.3 Insurance risk (continued)

The Company uses a non-statistical method to incorporate the various assumptions made in order to estimate the ultimate cost of claims. The history of the activity of the Company and the size of its portfolio does not enable yet to use actuarial methods, based on past experience. The directors have adopted a methodology based on a budgeted loss ratio of the underwriting year, as approved by the Actuary. The budgeted loss ratio is applied to the turnover. The IBNR is the difference between the amount calculated and the claims already settled. The IBNR amount for 2018 has been estimated on 50% of the gross written premium, net of 70% reinsurance and net of all paid/payable amounts and recoveries net of reinsurance.

Management has also reassessed the IBNR relating to potential claims in 2017 using a claims ratio of 40% of the gross written premium for 2017. An analysis of the actual claims in 2018 has revealed that the actual loss ratio approximates 6.8% for actual claims incurred relating to 2017 underwriting year and management have used the actual loss ratio to determine any additional provision for IBNR.

As at 31 December 2018, if the directors had used a LR ratio 10% higher or lower than 50%, pre tax profit would have been Rs 2,037,728 and Rs 5,138,865 respectively. As at 31 December 2017, if the directors had used a LR ratio 10% higher or lower than 40%, pre tax profit would have been higher or lower by Rs 2,856,565.

3.4 Financial risk – Maturity profiles

The Company is exposed to a range of financial risks through its financial assets, financial liabilities, reinsurance assets and insurance liabilities. The most important components of this financial risk are market risk (including foreign exchange risk, interest rate risk, other price risk), credit risk and liquidity risk.

These risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements. The principal technique is to match assets to the liabilities arising from insurance contracts by reference to the type of benefits payable to contract holders. The Company has not changed the processes used to manage its risks from previous periods.

The following table summarises the maturity profile of the financial assets, financial liabilities and insurance contract liabilities of the Group based on remaining undiscounted contractual obligations, including interest payable and

3.4.1 Foreign exchange risk

The Group is exposed to foreign exchange risks arising from financial assets denominated in foreign currencies.

| THE GROUP | | | | |
|-----------------------|-----------------------|----------------------------|-----------------------------|-----------------------------|
| At 31 December 2018 | EURO | USD | RS | Total |
| Assets Liabilities | 4,155,796 | 11,649,523 (23,866,704) | 111,166,705 (54,693,524) | 126,972,023 (78,560,228) |
| Net position | 4,155,796 | (12,217,181) | 56,473,181 | 48,411,795 |
| At 31 December 2017 | EURO | USD | RS | Total |
| Assets Liabilities | 2,747,061 (32,130) | 19,993,154 (17,855,848) | 84,284,549 (45,827,936) | 107,024,765 (63,715,914) |
| Net position | 2,714,931 ====== | 2,137,306 | 38,456,613 | 43,308,850 |

The Group is exposed to foreign exchange risk arising from cash and cash equivalents and financial assets and liabilities held in foreign currency The Company's financial assets are primarily denominated in the same currencies as its insurance contract liabilities. This mitigates the foreign currency exchange rate risk. Thus, the main foreign exchange risk arises from recognised assets and liabilities denominated in currencies other than those in which insurance liabilities are expected to be settled.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.4.1 Foreign exchange risk (continued)

As at 31 December 2018, if the Mauritian Rupee had weakened/strengthened by 10% against the EURO and USD, the Group's pre tax profit and equity would have been Rs 423,873 higher/lower and Rs 1,127,286 higher/lower respectively. As at 31 December 2017, if the Mauritian Rupee had weakened/strengthened by 10% against the EURO and USD, the Group's pre tax profit and equity would have been Rs 271,493 lower/higher and Rs 213,731 lower/higher respectively.

| THE COMPANY | I | | | |
|-----------------------|---------------------|----------------------------|-----------------------------|-----------------------------|
| At 31 December 2018 | EURO | USD | RS | Total |
| Assets Liabilities | 3,501,215 | 10,640,155 (23,822,739) | 109,165,161 (54,804,058) | 123,306,530 (78,626,797) |
| Net position | 3,501,215 | (13,182,584) | 54,361,102 | 44,679,733 ======= |
| At 31 December 2017 | EURO | USD | RS | Total |

| Net position | 1,674,980 ====== | 951,676 ====== | 39,342,612 | 41,969,267 |

As at 31 December 2018, if the Mauritian Rupee had weakened/strengthened by 10% against the EURO and USD, the Company's pre tax profit and equity would have been Rs 358,415 higher/lower and Rs 1,030,745 higher/lower respectively. As at 31 December 2017, if the Mauritian Rupee had weakened/strengthened by 10% against the EURO and USD, the Company's pre tax profit and equity would have been Rs 167,498 lower/higher and Rs 95,168 lower/higher respectively.

3.4.2 Credit risk

The Company's exposure to credit risk is the risk that a counterparty will be unable to pay amounts in full when due. Key areas where the Company is exposed to credit risk are:

- Reinsurers' share of insurance liabilities;
- Amounts receivable from insurance intermediaries and insurance contract holders.

The aged analysis of amount receivable from policyholders at year end are as follows:

| | THE G | ROUP |
|--|------------|------------|

| | | | |

Refer to Note 13 for disclosure for movement in provision for doubtful debts. The Company has no significant concentrations of credit risk. Other areas where credit risk arises include cash and cash equivalents and other receivables.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.4.3 Credit risk (continued)

The Company structures the levels of credit risk it accepts by placing limits on its exposure to a single counterparty. Such risks are subject to an annual or more frequent review. Limits on the level of credit risk by category are approved by the Managing Director.

Reinsurance is used to manage insurance risk. This does not, however, discharge the Company's liability as primary insurer. If a reinsurer fails to pay a claim for any reason, the Company remains liable for the payment to the policyholder. The creditworthiness of reinsurers is considered on an annual basis by reviewing their financial strength prior to finalisation of any contract. The Company's reinsurers, Atradius Re, ONDD, Caitlin, Endurance and R+V Re, are A, AA and AA rated by the rating agency Moody's and Standard and Poors. A and AA rating indicates a strong capacity of the financial institution to meet financial commitments but somewhat susceptible to adverse economic conditions and changes in circumstances.

The exposure to individual counterparties is also managed by other mechanisms, such as the right of offset where counterparties are both debtors and creditors of the Company. Management information reported to the Company includes details of provisions for impairment on loans and receivables and subsequent write-offs. Where there exists significant exposure to individual policyholders, or homogenous groups of policyholders, a financial analysis equivalent to that conducted for reinsurers is carried out by the risk department.

The financial assets are analysed in the table below using Moody's and Standard and Poors (S&P) rating (or equivalent when not available from S&P). The concentration of credit risk is substantially unchanged compared to the prior year.

For banks, the Company transacts only with highly reputable financial institutions. The credit quality of this financial asset can be assessed by the historical information about the financial strengths of the financial institutions the Company is dealing with.

In the opinion of the Company there is no associated risk as these are reputable institutions in the industry.

3.4.4 Liquidity risk

Liquidity risk is the risk that the Company is unable to meet its obligations when they fall due as a result of policyholder benefit payments, cash requirements from contractual commitments, or other cash outflows. Such outflows would deplete available cash resources for operational, trading and investments activities. In extreme circumstances, lack of liquidity could result in sales of assets, or potentially an inability to fulfil policyholder commitments. The risk that the Company will be unable to do so is inherent in all insurance operations and can be affected by a range of institution-specific and market wide events.

The Company's liquidity management process, is monitored by the general manager and the accountant and includes day-to-day monitoring of the current liquidity position and of future cash flows requirements to ensure that requirements can be met, while maintaining a portfolio of highly marketable assets that can easily be liquidated as protection against any unforeseen interruption to cash flow and monitoring the liquidity ratios of the statement of financial position.

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. In respect of catastrophic events there is also a liquidity risk associated with the timing differences between gross cash out—flows and expected reinsurance recoveries.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.4.4 Liquidity risk (continued)

The following policies and procedures are in place to mitigate the Company's exposure to liquidity risk:

A liquidity risk policy which sets out the assessment and determination of what constitutes liquidity risk for the Company.

Compliance with the policy is monitored and exposures and breaches are reported to the Company's risk committee.

The policy is regularly reviewed for pertinence and for changes in the risk environment.

The Company's catastrophe excess—of—loss reinsurance contracts contain clauses permitting the immediate draw down of funds to meet claim payments should claim events exceed a certain size.

The table below presents the cash flows payable by the Company for managing liquidity risk by remaining contractual maturities at the reporting date. The amounts disclosed in the table are the contractual undiscounted cash flows.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.4.5 Interest rate risk

The Company takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. The rates of interest on the bank deposits which are on a variable interest rate basis are subject to the prevailing bank prime lending rate.

The Company's interest risk policy requires it to manage interest rate risk by maintaining an appropriate mix of fixed and variable rate instruments. The policy also requires it to manage the maturities of interest bearing financial assets and interest bearing financial liabilities. Interest on floating rate instruments is re—priced at intervals of less than one year. Interest on fixed interest rate instruments is priced at inception of the financial instrument and is fixed until maturity.

The Group and Company's interest rate risk arises from bank deposits. At 31 December 2018, if interest rate had been 1% higher/lower with all other variables held constant, the Group and Company's profit and equity for the year would have been Rs 485,218 and 449,678 respectively higher/lower (2017 – profit and equity for the year would have been Rs 433,089 and 419,693 lower/higher for the Group and the Company).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.4.6 Price risk

The Company's exposure to price risk arises in its investment in available for sale financial assets at 31 December 2018 (2017 nil).

| Available for sale | 21.543.862 | Rs 13,520,990 |
|--------------------|------------|------------------|
| Available for sale | 21,543,862 | 13,520,990 |

3.4.7 Fair values risk

The carrying amounts of trade and other receivable, reinsurance contract, cash at bank, insurance liabilities, amount payable to reinsurers and trade and other payables approximate their fair values at 31 December 2018 and 31 December 2017 due to their short term nature.

3.4.8 Capital risk management

In order to maintain or adjust the capital structure, the Company may issue new shares or have recourse to its shareholders for funding and vary the amount of dividends or return on capital to the shareholders.

The Company's objectives when managing capital are:

- to comply with the insurance capital requirement and solvency rules required by the regulator of the insurance market in Mauritius and the Mauritian Insurance Act 2005 (as amended in 2007);
- to safeguard the Company's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- to provide an adequate return to shareholders by pricing insurance and investment contracts commensurately with the level of risk.

The law requires that the Company at all times keep and maintain a solvency margin in accordance with the General Insurance Business Solvency Rules. The Solvency margin shall at all times be at least 100% of the minimum capital requirement. The capital requirement ratio shall at all times be at the target level of at least 150%.

The Mauritian Insurance Act 2005 (as amended in 2007) also requires that at all times the Company shall maintain a stated capital of not less than Rs 25 million and shall make good forthwith any part of the stated capital that is impaired by losses or otherwise.

The table below summarises the minimum capital required against the regulatory capital held as per the solvency margin.

| | 2018 | 2017 |
|----------------------------|------------|------------|
| | Rs | Rs |
| Total capital available | 46,361,694 | 44,875,623 |
| Minimum regulatory capital | 15,296,323 | 11,900,950 |
| | | |
| Capital adequacy ratio | 303% | 377% |

The Company has therefore complied with the minimum capital requirement ratio for 2018 and 2017.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.6 Standards issued and effective

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Company's financial statements are disclosed below. Only those standards and amendments issued not effective applicable to the Company has been considered. The Company intends to adopt these standards when they become effective.

IFRS 9 Financial Instruments

In July 2014, the IASB issued the final version of IFRS 9 Financial Instruments that replaces IAS 39 Financial Instruments: Recognition and Measurement and all previous versions of IFRS 9. IFRS 9 brings together all three aspects of the accounting for financial instruments project: classification and measurement, impairment and hedge accounting. IFRS 9 is effective for annual periods beginning on or after 1 January 2018, with early application permitted. Except for hedge accounting, retrospective application is required but providing comparative information is not compulsory. For hedge accounting, the requirements are generally applied prospectively, with some limited exceptions.

During 2018, the Company performed a high-level impact assessment of all three aspects of IFRS 9. Overall, the Company expects no significant impact on its balance sheet and equity, except for the effect of applying the impairment requirements of IFRS 9. The Company expects a higher loss allowance resulting in a negative impact on equity and will perform a detailed assessment in the future to determine the extent. The Company meets the eligibility criteria of the temporary exemption from IFRS 9 and intends to defer the application of IFRS 9 until the effective date of the new insurance contracts standard (IFRS 17) of annual reporting periods beginning on or after 1 January 2022, applying the temporary exemption from applying IFRS 9 as introduced by the amendments (see below).

Amendments to IFRS 4 Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts

In September 2016, the IASB issued amendments to IFRS 4 to address issues arising from the different effective dates of IFRS 9 and the new insurance contracts standard (IFRS 17).

The amendments introduce two alternative options of applying IFRS 9 for entities issuing contracts within the scope of IFRS 4: a temporary exemption; and an overlay approach. The temporary exemption enables eligible entities to defer the implementation date of IFRS 9 for annual periods beginning before 1 January 2021 and continue to apply IAS 39 to financial assets and liabilities.

An entity may apply the temporary exemption from IFRS 9 if:

- it has not previously applied any version of IFRS 9, other than only the requirements for the presentation of gains and losses on financial liabilities designated as FVPL; and
- its activities are predominantly connected with insurance on its annual reporting date that immediately precedes 1 April 2016. The overlay approach allows an entity applying IFRS 9 to reclassify between profit or loss and other comprehensive income an amount that results in the profit or loss at the end of the reporting period for certain designated financial assets being the same as if an entity had applied IAS 39 to these designated financial assets.

An entity can apply the temporary exemption from IFRS 9 for annual periods beginning on or after 1 January 2018. An entity may start applying the overlay approach when it applies IFRS 9 for the first time.

The Group applies the temporary exemption from IFRS 9 as permitted by the amendments to IFRS 4 Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts issued in September 2016. The temporary exemption permits the Group to continue applying IAS 39 rather than IFRS 9 for annual periods beginning before 1 January 2022.

The Group concluded that it qualified for the temporary exemption from IFRS 9 because its activities are predominantly connected with insurance. As at 31 December 2018, the Group's gross liabilities arising from contracts within the scope of IFRS 4 represented 94% of the total carrying amount of all its liabilities. Since incorporation, there has been no change in the activities of the Group that requires reassessment of the use of the temporary exemption.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.6 Standards issued and effective(continued)

IFRS 15 Revenue from Contracts with Customers

Several other amendments and interpretations apply for the first time in 2018, but do not have an impact on the financial statements of the Company. The Company has not early adopted any standards, interpretations or amendments that have been issued but are not yet effective.

The subsidiary applied IFRS 15 for the first time. The nature and effect of the changes as a result of adoption of these new accounting standards are described below.

IFRS 15 supersedes IAS 11 Construction Contracts, IAS 18 Revenue and related Interpretations and it applies, with limited exceptions, to all revenue arising from contracts with its customers. IFRS 15 establishes a five-step model to account for revenue arising from contracts with customers and requires that revenue be recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

IFRS 15 requires entities to exercise judgement, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with their customers. The standard also specifies the accounting for the incremental costs of obtaining a contract and the costs directly related to fulfilling a contract. In addition, the standard requires extensive disclosures.

Impact of adoption of IFRS 15

The subsidiary adopted IFRS 15 using the modified retrospective method of adoption with the date of initial application of January 2018. Under this method, the standard can be applied either to all contracts at the date of initial application or only to contracts that are not completed at this date. The Company elected to apply the standard to all contracts as at 1 January 2018.

Revenue policy for the period ended 31 December 2017 (prior period) under the previous revenue standard, IAS 18

Under the IAS 18 revenue standard used in 2017, revenue comprises the fair value of proceeds for services rendered, net of value-added tax. Revenue for investment income was recognised as follows: Income from investments is included in profit or loss on the following bases: Interest - As it accrues using the effective interest rate method. Refer to Note 2.3 paragraph o for more details.

Quantitative impact

The cumulative effect of initially applying IFRS 15 is recognised at the date of initial application as an adjustment to the opening balance of retained earnings. Therefore, the comparative information was not restated and continues to be reported under IAS 11, IAS 18 and related Interpretations. Under IFRS 15, revenue is recognised on transfer of control. The main revenue stream of the company is derived from sale of credit worthiness reports. The subsidiary has concluded that transfer of control occurs on delivery of the reports. This revenue continues to be recognised at a point in time under IFRS 15. Hence, there is no quantitative impact on adoption of IFRS 15.

3.7 Standards issued but not yet effective

IFRS 16 Leases

IFRS 16 was issued in January 2016 and it replaces IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. IFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single on-balance sheet model similar to the accounting for finance leases under IAS 17. The standard includes two recognition exemptions for lessees – leases of 'low-value' assets (e.g., personal computers) and short-term leases (i.e., leases with a lease term of 12 months or less). At the commencement date of a lease, a lessee will recognise a liability to make lease payments (i.e., the lease liability) and an asset representing the right to use the underlying asset during the lease term (i.e., the right-of-use asset). Lessees will be required to separately recognise the interest expense on the lease liability and the depreciation expense on the right-of-use asset.

Lessor accounting under IFRS 16 is substantially unchanged from today's accounting under IAS 17. Lessors will continue to classify all leases using the same classification principle as in IAS 17 and distinguish between two types of leases: operating and finance leases.IFRS 16 also requires lessees and lessors to make more extensive disclosures than under IAS 17.

IFRS 16 is effective for annual periods beginning on or after 1 January 2019. Early application is permitted, but not before an entity applies IFRS 15. A lessee can choose to apply the standard using either a full retrospective or a modified retrospective approach. The standard's transition provisions permit certain reliefs. The Company is currently assessing the impact of IFRS 16 on its financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.7 Standards issued but not yet effective (continued)

IFRS 2 Classification and Measurement of Share-based Payment Transactions — Amendments to IFRS 2

The IASB issued amendments to IFRS 2 Share-based Payment that address three main areas: the effects of vesting conditions on the measurement of a cash-settled share-based payment transaction; the classification of a share-based payment transaction with net settlement features for withholding tax obligations; and accounting for a modification where the terms and conditions of a share-based payment transaction changes its classification from cash settled to equity settled.

On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and other criteria are met. The amendments are effective for annual periods beginning on or after 1 January 2018, with early application permitted. The company does not have any share based payment scheme.

IFRS 17 Insurance Contracts

In May 2017, the IASB issued IFRS 17 Insurance Contracts, a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure, which replaces IFRS 4 Insurance Contracts.

In contrast to the requirements in IFRS 4, which are largely based on grandfathering previous local accounting policies for measurement purposes, IFRS 17 provides a comprehensive model (the general model) for insurance contracts, supplemented by the variable fee approach for contracts with direct participation features that are substantially investment-related service contracts, and the premium allocation approach mainly for short-duration which typically applies to certain non-life insurance contracts. The main features of the new accounting model for insurance contracts are, as follows:

- The measurement of the present value of future cash flows, incorporating an explicit risk adjustment, remeasured every reporting period (the fulfilment cash flows)
- A Contractual Service Margin (CSM) that is equal and opposite to any day one gain in the fulfilment cash flows of a group of contracts. The CSM represents the unearned profitability of the insurance contracts and is recognised in profit or loss over the service period (i.e., coverage period)
- Certain changes in the expected present value of future cash flows are adjusted against the CSM and thereby recognised in profit or loss over the remaining contractual service period
- The effect of changes in discount rates will be reported in either profit or loss or other comprehensive income, determined by an accounting policy choice
- The recognition of insurance revenue and insurance service expenses in the statement of comprehensive income based on the concept of services provided during the period
- Amounts that the policyholder will always receive, regardless of whether an insured event happens (non-distinct investment components) are not presented in the income statement, but are recognised directly on the balance sheet
- Insurance services results (earned revenue less incurred claims) are presented separately from the insurance finance income or expense
- Extensive disclosures to provide information on the recognised amounts from insurance contracts and the nature and extent of risks arising from these contracts.

IFRS 17 is effective for annual reporting periods beginning on or after 1 January 2022, with comparative figures required. Early application is permitted, provided the entity also applies IFRS 9 and IFRS 15 on or before the date it first applies IFRS 17.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS - 31 DECEMBER 2018 (CONTINUED)

SECTION 3: INSURANCE, FINANCIAL RISK AND OTHERS

3.7 Standards issued but not yet effective (continued)

IFRS 17 Insurance Contracts (Continued)

4 REVENUE

Retrospective application is required. However, if full retrospective application for a group of insurance contracts is impracticable, then the entity is required to choose either a modified retrospective approach or a fair value approach.

The Company plans to adopt the new standard on the required effective date together with IFRS 9 (see above). The Company started a project to implement IFRS 17 and has been performing a high-level impact assessment of IFRS 17. The Company expects that the new standard will result in important change to the accounting policies for insurance contract liabilities of the Company and is likely to have an impact on profit and total equity together with presentation and disclosure.

20. RETIREMENT BENEFIT OBLIGATIONS

(a) Defined contribution plan

Retirement benefits to employees of the Company are provided by a Defined Contribution Pension Scheme, the United Mutual Superannuation Fund, which is administered by Feber Associates Ltd and is funded by contribution from the Company and employees. Payments made by the Company are charged to the statement of profit or loss in the year in which they are payable

(b) Gratuity on retirement

The Company is required to pay gratuity in accordance with Section 49 of the Employment Rights Act 2008. For members of the Company's defined contribution, the obligation relates to the residual retirement gratuity and as a result 5 times the annual pension, relating to the employer's share of contributions, is offset from the retirement gratuity. The following table summarises the components of net benefit expense recognised in the statement of profit or loss and the unfunded status and amounts recognised in the statement of financial position.

Refer to Note 2.3 paragraph u
